

Stik-Withit® Pre-Coated Adhesive Paper Rolls

For producing high-performance, consistent-quality notepads

Designed for the
small to medium-sized
web printing market

Manufactured and Distributed by

CPD

The Coated Products Division of
PCI, Paper Conversions, Inc.

CPD delivers high-performance, pre-coated Stik-Withit® adhesive paper rolls to clients in more than 34 countries around the world.

Our superior adhesives, fine papers and ready supply have made us the number-one fastest-growing supplier to the small and medium-sized web press market today.

We make it possible – and easy – for printers to produce high-quality notepads for their own local and regional markets.

Reliability Starts with Gel-Tac®

CPD rolls are coated with Stik-Withit® ultra-repositionable adhesive. Made with Gel-Tac® microsphere technology, Stik-Withit® adhesives provide easy-peel, stable stick — resulting in note sheets that can be removed and reapplied countless times without loss of adhesion. With Gel-Tac® you will always have a controlled tack level and no residue.

We stock high-quality papers for our coated rolls to ensure your end product is the finest it can be. Our Stik-Withit® rolls are ideal for these printing processes:

- Digital
- Flexography
- Offset
